Speaker 1:

Okay, so we have Carolyn here. She is three months post-op from her breast reduction surgery. Carolyn, tell us a little bit about your recovery process.

Carolyn:

It has been great. I had the surgery done and in a week, I was back at work. No pain medicine was required during the whole procedure, and it's just amazing how much better I feel with the weight and the size. And Dr. Burgdorf and his staff has been excellent. They were very sensitive to my needs and to my concerns. And my only regret is I didn't do it sooner.

Speaker 1:

Awesome. Well, we are really happy that you are on a road to wonderful recovery. And just one more thing, how did you know Dr. Burgdorf was the right surgeon for you?

Carolyn:

When I came for my consultation, after talking with him, I did not feel it necessary to try to go any further. I was very satisfied with him and his ability to ease my concerns about the whole process and the recovery time and the staff was just excellent.

Speaker 1:

Awesome. Thank you.
