

Speaker 1:

So, hi, this is Stacey Frye and wanted to ask her maybe top three things about her experience with Dr. Burgdorf's surgery that she enjoyed.

Stacey:

Hi. My favorite things about Dr. Burgdorf are that he is super kind. Just immediately you meet him, on my first visit I got to know him well enough to trust him. There was never a question as to would I put my life in his hands, or even my belly in his hands. I think my favorite experience overall was when I was in my pre-op. He was always careful to make sure his hands were dry, I mean, I'm sorry. I'll just start over. Make sure his hands were warm. And so I was never shocked by cold hands on my belly. He was super careful and tender.

And then after the surgery, I think the immediate situation was that I was in a lot of pain yet Dr. Burgdorf called me and checked up on me that evening. And I felt very comfortable to talk to him about my questions and my needs. And it was just really easy to talk to him.

Speaker 1:

What made you decide on him?

Stacey:

Well, it wasn't that hard because my doctor, my chiropractor, recommended him and that was the only recommendation I needed. And I just, as soon as I met Dr. Burgdorf, I was set.

Speaker 1:

Stacey, tell us some top things about now, three months out of your surgery, what do you think about your results?

Stacey:

Well, I'm extremely happy with our results. I feel like a new person. There's days that I look at myself in the mirror and I'm like, "Who is that mom?" I don't recognize her. And I'm so thankful that I got the results that I was looking for from Dr. Burgdorf, and that the staff here has been so excellent to support me in this journey.
