

Speaker 1:

This is one of our patients, Ashley. She's actually going to answer a few questions for us today. Thank you for being here, Ashley.

Ashley:

Thank you for having me.

Speaker 1:

So, what would you say your biggest fear prior to surgery was?

Ashley:

I just want to say knowing if I'm going to get the right size, the actual surgical process, and the recovery process.

Speaker 1:

So what was some of the motions that you went through after the surgery?

Ashley:

It was a couple of things. Just being open about the surgery, talking to different people about it, and then just being okay with the size.

Speaker 1:

How do you feel about your results?

Ashley:

I feel good. I feel like they feel natural, which is what I was going for at the beginning. I definitely think that he got me to a size that I'm very happy with.

Speaker 1:

Good. And what would you tell a friend or a family member that has been thinking about surgery, but they have their own fears?

Ashley:

Talk to somebody about it. Ask a lot of questions. Talk to somebody who's been through it before, because they're going to understand the emotional roller coaster that you're going to feel after you've had it done. They're going to understand the physical changes that you're going to go through.

Speaker 1:

Well, thank you for being with us and we will see you soon, Ashley.

Ashley:

Thank you.
