

Speaker 1:

So Jacqueline, can you tell us a little bit about your experience here with Dr. Burgdorf?

Jacqueline:

My appearance was absolutely amazing, not just with him, with the staff. I love the fact that even on ... I had my surgery, it was a holiday weekend, and so no one's in the office. But Dana texted me when I got home. She followed up the whole time through. She wished me a happy holiday. She asked did I need anything. She asked was I in any pain or if I had any questions. And I absolutely, positively love the fact that, when you're going through pain, most doctor's offices, they'll send you home with pain medicine, but then that's it. You don't hear from them unless you call them. So the fact that someone was there holding my hand all the way through the process from the office made me feel amazing.

I think that, financially, it was well worth it. I felt like I got my money's worth. And if I had to do it all over again, I absolutely, positively would do it all over again. And I think the most important thing that I always tell people is do your research. I actually came to Dr. Burgdorf in 2014. And I remember at that time I was a little bit overweight and he said, "I can do it, but you're not going to get the results that you want." So I actually listened to him and I went back and I lost over a hundred pounds, and I came back. And I'm glad I did because he gave me the results that I wanted.

And I know people look at stuff like this, and sometimes they think it's so fake, but this is so real. What made me actually come back to him is that, when you're an obese person and you're carrying that kind of weight in your discomfort, you want to feel normal again. And so when I came to visit him the first time, he grabbed the fat on my stomach, and I'll never forget and I always remind him of this and we laugh. When he did my evaluation, he said, "I'm going to take that and I'm going to remove that, and then I'm going to throw it in the trash." And that was the first time I knew that he was the doctor for me because I wanted that gone. It was trash to me and it needed to be discarded. And that's what really made me pick him.

So I'm glad I did. I love the results. I love the environment in here, and I think the staff is amazing. So if you're thinking about him, trust me. Do your research. You'll love him. You'll love him.

Speaker 1:

Awesome. Well, thank you so much, Jacqueline.

Jacqueline:

Thank you.
