

Speaker 1:

Hi, I came to Dr. Bergdorf after doing a lot of research and talking to a lot of other plastic surgeons and asking them who they would go to if they needed any procedure done. Unanimously, the other surgeons recommended Dr. Bergdorf. I have found out immediately upon walking into his office that all of their recommendations were spot on. His staff is phenomenal. His office is warm and welcoming. He's super easy to talk to. You can explain your concerns to him and he's very patient and he listens and he actually hears your concerns and addresses all of them.

I came here after losing about 85 pounds. And so I had a lot of extra skin and really, I was just looking to have all that extra skin removed. He explained the different options to me step-by-step. Everything he said was accurate and thorough from what I could expect pre-op to what I could expect the day of surgery, what I could expect in recovery and what I could expect longterm.

Everything was exactly as he said. I knew what I was facing, and it actually was a lot easier than I anticipated. Even on the day of surgery, he was smiling. He came in. He calmed any last minute fears. After surgery, same thing throughout all of my followup appointments. He and his staff have been phenomenal. My results are off the chart. Amazing. They're so much better than I ever dreamt they could be. As far as scar, my scar is minimal. It's healing really well. Pain, I had hardly any pain at all. I took one pain pill the day of surgery and never needed another one. Recovery was smooth. I didn't have any complications at all, and the results were fantastic. I had found my surgeon for life.
